WATERSCAPES in HERITAGE and ENVIRONMENT

Summer School in Croatia, 1-7 June 2024

The Summer School *Waterscapes in Heritage and Environment* stems from the long standing commitment of the MA in *Planning and Management of Tourism Systems* towards sustainability, and environmental conservation, joint with the focus on cultural heritage and community studies.

In the 2024 edition we are experimenting one step more in the sustainability challenge: We have provided our boat with portable SOLAR PANELS and a RECHARGEABLE POWER STATION that will allow our devices as cellphones and laptops to be charged at night with the energy collected during the day, becoming independent from the boat electrical system.

Sharing limited resources, lowering our environmental impact, diminishing our consumes becomes a daily practice while learning and shifting our gaze from the land to the sea.

1 June	morning	EMBARK – Zadar Port h 11 INTRODUCTION to the School Program, Daily and week ASSIGNMENTS	Elena Bougleux, University of Bergamo, Sanja Iguman IFDT Belgrade
