

WATERSCAPES

in HERITAGE and ENVIRONMENT

University of Bergamo - MA in Planning and Management of Tourism Systems
University of Belgrade - Institute for Philosophy and Social Theory
University of Rijeka - Delta Lab / PhD Program

Croatia 16-24 September

WATERSCAPES in Heritage and Environment *deals with the interplay between Historical, Cultural and Natural Heritage*

WATERSCAPES *most innovative feature is Navigation*

The boat becomes the working and living space for one week for 20 international participants

WATERSCAPES - Main Focuses

- Cultural Heritage: the legacy of the Venetian Republic; the UNESCO network; city of Zadar
- Local Knowledge and citizens' engagement; involvement of local stakeholders in Omišalj, Krk, Cres
- Sustainability in the Adriatic Sea. Explore the most important Marine Protected Areas; Telašćica Nature Park
- Dark Heritage and political identities; Balkan fragmentation and identity issues in Goli Otok

WATERSCAPES - Contents Outline

WHY

The Summer School brings closer together, in the same ideal and practical framework, **cultural heritage** and **environmental preservation**. The main actors involved in the use of these coupled resources are local communities, since they maintain with heritage and environment the deepest relation, as these represent their familiar contexts, the premises and background for their sustainable living.

HOW

The core idea of the Summer School is to **learn in a cooperative** way while **sharing limited resources**. In the Anthropocene we learn that all fundamental resources are limited, and they need to be managed wisely and carefully. On the boat, **water** and **space** are limited resources, so the first didactic goal is their virtuous sharing.

WHAT

Our focus is **Water**. Water is the connecting medium, the material link among communities and places, across history and today. Water belongs to everybody, it is alive in its motions and transformations. Water connects heritage sites and environmental emergencies. Water requires that any action is collective, shared, fluid, and global. The Water we intend is not only a natural resource, but rather a socio-cultural construct. We decide to rename our methodology, from the classical *fieldwork* approach into new **water-field** and **water-work approaches**.

Our **Boat is a Working Space**. The living and working space shared by the community for a week, invites a deep reflection on the **sustainability of maritime life**, and draws attention to the meaning of distributed responsibility.

Our gaze is on the **Croatian costs as examples of Anthropocene complexity**, where a identity, history, shared territories and heritage clash against borders, regulations and scarcity. The focus is on the deep **interaction** among **academics, students and local communities** that provides a complex and fruitful data set to read the places in a commonly developed perspective.

WATERSCAPES - Itinerary and Program

The Summer School is articulated on **SIX daily seminars** and workshops on board, and **FIVE visits on the ground**. The seminars on board are held by professors and researchers coming from Italy, Serbia, Croatia and France (*see detailed program*).

All destinations will be reached by boat, according to the itinerary, and will be introduced by visiting lecturers and experts. **All activities are compulsory**, and the participation of students is intended for the full week. International Students will come from the organizing partner institutions.

Departure/Return Opatija (Rijeka)

16.09	Welcome in Rijeka Transfer to Opatija
17.09	Opatija - Omisalj - Krk
18.09	Krk - Goli Otok - Rab
19.09	Rab - Zadar
20.09	Zadar - Telašćica
21.09	Telašćica - Mali Lošinj
22.09	Mali Lošinj - Cres
23.09	Cres - Opatija
24.09	Disembark in Opatija

17 September early morning, get on board

17-23 September will be effective navigation days

24 September early morning, get off board

WATERSCAPES - Logistics

The 7-days Summer School *WATERSCAPES* takes place on board of a dedicated boat, hosting 20 pax plus the crew. The boat will navigate in the North Adriatic Sea, according to the itinerary established by the Organizers.

The students will live on board for the entire week, accommodated in **double cabins** (8 cabins, 16 students).

The seminars will be held on board, in appropriated spaces, **indoor and/or outdoor**, according to the weather conditions. Two organizers and teaching staff will be permanently on the boat (1 cabin), for the entire duration of the Summer School. The other two teaching staff will alternate according to the program (1 cabin), therefore completing the available cabins.

Meals will be offered on board and are included in School fee, **except dinners**, to be organized independently on board or on land. All visits tickets are included.
